EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Benjamin Stasa on August 22, 2007.

Claim 12 was changed to depend from claim 1.

On line 2 of claim 13, the word –additionally—was inserted after the word “microsensor”.

Claim 25 was changed to depend from claim 15.

On line 2 of claim 26, the word –additionally—was inserted before the word “includes”.

2. The following is an examiner's statement of reasons for allowance: Application serial no. 10/737,422 is being allowed since none of the prior art of record teaches or fairly suggests a single-use microsystem for determining the clotting time of blood comprising a microfluidic channel formed in the device having an inlet and an outlet, a microsensor at least partially in communication with the channel for sensing when a blood sample in the channel clots, wherein the microsensor includes a pair of spaced, conductive traces extending along the length of the channel and wherein the conductive traces are variably spaced at different distances from one another along the length of the channel, and a signal processor for processing signals from the microsensor to obtain a clotting time for a blood sample. In particular, none of the prior art of

record teaches or fairly suggests such a device wherein the conductive traces are spaced along a microchannel at variable distances or spacings from one another along the length of the channel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Please make note of the full article for Martin et al (from the Proceedings of the 39th Annual Design Automation Conference), whose abstract was cited in the last Office action mailed on May 15, 2007.
